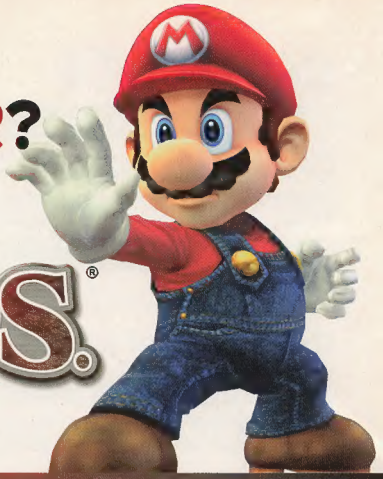
THE GREATEST VIDEO GAME EVER?

SUPER SMASH BROS.® BRAWL



ANATOLE BROWN TAKES A CLOSER LOOK

Finally, after a slight setback from its initial release date, *Super Smash Bros. Brawl* for the Nintendo Wii is primed to go! Nintendo has been leaking a steady stream of information about the game since last year, and we've compiled it all together to give you a massive head start before all the mayhem erupts on February 10th. Who are the new characters? What are the new gameplay modes? Can you battle online? How will it utilize the new Wii controller? We've got all your answers right here!

BATTLE BASICS

Most of you are familiar with the basic gameplay of the series, whether you honed your chops on *Super Smash Bros. Melee* for the GameCube or come as an old-school player from the original *Super Smash Bros.* for the N64. The basic idea is to choose from a wide selection of Nintendo characters (plus a few non-Nintendo surprises!) and duke it out in a four-way battle. The last one left standing is the winner. Unlike standard fighting games, however, the goal is to launch your opponent as far away from the battle arena as possible so they could never possibly return. Masahiro Sakurai, the lead designer of *Super Smash Bros. Brawl*, calls it a "sport" rather than a fighting game.

Each character has a damage meter—the more you get hit, the higher your damage percentage goes up. As your damage meter rises (the maximum is 999%), you will get blasted further away each time you get hit. Players have the ability to recover with various techniques, like hopping back into the stage or using any number of special abilities. Thinking of creative ways to get back onto a platform becomes an important part of the strategy. Eventually, however, any severely damaged player will go shooting off like a rocket into the stratosphere.

OFFENSE

Each player has three basic attacks: Standard Attack, Strong Attack and Smash Attack. The Standard and Strong Attacks are primarily used to build up an opponent's damage meter. The Smash Attack is then used to send the opponent flying in any direction. These attacks are amplified by the use of four different Special Moves that are unique to each character. Not all the Special Moves are necessarily damaging, but each of them has a unique effect. By strategizing and combining these different offensive moves, players will come to learn the subtle intricacies of the fighting system and become a more advanced player. New this year is the ability to string together attacks by just holding down the Attack button. Previously, players had to continuously tap the button in order to string together attacks (although this method will still work).

Defense

As always, players will be able to shield and dodge against oncoming attacks. By pressing the Shield button, a bubble-like sphere will appear and protect the player from getting hit. The catch is that the shield grows smaller each time an attack is deflected. If you completely lose your shield, you will lose consciousness and become extremely vulnerable. Dodging, on the other hand, has no limitations. In fact, your character is briefly invincible while performing a dodge move. Highly experienced players will know how to mix up defensive moves to stay in the game.

Throws

The throw move is a slightly more advanced technique where players can grab an opponent and toss them into the air to start an aerial combo. The grab move is performed by pressing the Attack button while in shield mode, thus it's best used when an opponent comes in close to attack. Conversely, the grab and throw move can be performed on any shielded character. Master this move and you will rise to the upper echelon of fighters!

Charged Special Moves

Special Moves can be charged up to increase their power even more. Simply hold down the Special Move button and push it again after you've charged it up. The longer you hold down the button, the more powerful your strike will be.

Final Smash

The most powerful move in the game is called the Final Smash. Each character has a unique Final Smash move. However, the move can only be performed if you manage to obtain the Smash Ball, a special item which only appears once per match. Whenever the Smash Ball appears, you can bet that everyone will be clamoring for the prize!

Items

Items play a huge role during battle and can make the difference between winning and losing. Various random items will appear during battle, and in each case, the first one who gets it will be able to use it. Most of them are helpful, but some items can be a little unwieldy and difficult to use. Some of the new items being introduced this year:

- **Superspicy Curry**—Eat it and flames come out of your mouth.
- **Pitfall**—An *Animal Crossing* item which puts a hole in the ground
- **Gooey Bomb**—A sticky bomb that can be passed around
- **Franklin Badge (from *Mother 3*)**—A projectile deflector
- **Smoke Bomb**—A bomb that reduces visibility.

Plenty of familiar items from previous installments will also make their appearances, like the Golden Hammer, Banana Peel, Beam Sword and others.

THE CHARACTERS

OK, let's get to what you really want to know—who are the characters? This is the list we know so far, but more surprises are sure to come.

MARIO

Mario is the most balanced character in the game. His superior jumping maneuvers make him a pesky opponent to try and knock off. This year, he comes with a new Down Special Move—the F.L.U.D.D. hose pack from *Super Mario Sunshine*! The water spray doesn't deliver any damage, but it can send opponents flying off platforms. Although the Down Special Move used to be his Mario Tornado attack, he is still able to perform his signature spinning move (assigned to a new button perhaps?). His Final Smash move, Mario Finale, will make his eyes glow with fire before he launches a tremendous multi-projectile attack.

LINK

Link's Master Sword makes him a favorite with players who like to hack and slash. His various gadgets all come into play when utilizing his unique Special Moves, including Gale Boomerang, Hero's Bow, Bomb and Spin Attack. The Clawshot also acts as a tether recovery tool, where he can shoot it at available ledges and get back onto the platform.

CONTINUED

KIRBY

The pink ball of fluff can be an absolute terror with his ability to suck up an opponent and copy its moves. Kirby's Final Smash move will showcase some of his cooking talents!

PIKACHU

Everyone's favorite Pokémon is also a well-rounded character, much like Mario. He's one of the smaller fighters in the game, but his highly charged electricity attack more than makes up for his diminutive size. His Volt Tackle Final Smash move turns him into a giant ball of lightning. Because of its power, the ball is very difficult to control and may even send Pikachu himself off the deep end.

FOX

Fox McCloud from the *Star Fox* series is one of the fastest characters in the game. His Blaster pistol also makes him a favorite among players with an itchy trigger finger. His suit has been upgraded to include a few new functions. For example, the Reflector—a device that can reflect projectiles back at an opponent—is now a part of his costume. His Final Smash move summons the Landmaster, a giant tank that you can control and decimate your opponents with!

SAMUS/ZERO SUIT SAMUS

Samus Aran from the *Metroid* series wears her Power Suit at the start of the match. But if you launch her Zero Laser (a fully charged blast from her arm cannon) as a Final Smash move, she will lose all her armor and become Zero Suit Samus, a much weaker form. On the plus side, she will get to use the Plasma Whip, a handy weapon with many Special Moves. It can also be used as a tether recovery tool that can latch onto any ledge and pull her back up.

ZELDA

Not much is known about the princess from *The Legend of Zelda*. Will her new look give her new powers? Will Sheik appear as her alternate character? What she lacks in physical skills she makes up for with her powerful magic spells.

BOWSER

Always the favorite choice for players who like sheer size and power, Mario's arch-nemesis Bowser weighs in as the burliest character in the game. He can grow even bigger with his frightening Final Smash move—Giga Bowser Transformation! Giga Bowser appeared as a top-secret boss character in *Super Smash Bros. Melee*, but this time you can control him!

DONKEY KONG

It's on like Donkey Kong when DK starts winding up for his devastating Haymaker punch. His Final Smash move, Konga Beat, has him busting out his DK Bongos (complete with **START** button) and grooving to the beat!

YOSHI

Mario's pal (and ride), Yoshi has an incredibly long, floating jump and has the ability to attack enemies below. His signature Egg Toss move also allows him to extend his flight. His Final Smash move turns him into Super Dragon mode where he sprouts wings and spews fire!

PEACH

The Princess of the Mushroom Kingdom isn't much of a brawler, but she can silence her opponents with pure allure. Take her Final Smash move, Peach Blossom, for instance. She dances and mesmerizes her opponents until a whole bunch of peaches fall from the sky. Those hit by a peach will fall into a deep sleep. Meanwhile, she can recharge her health by eating the peaches and use her *Mario Golf* clubs to launch her opponents into oblivion.

ICE CLIMBERS

Representing Nintendo's rich arcade history are the Ice Climbers: Popo and Nana. They wield powerful hammers and can freeze opponents in mid-action. Their Final Smash causes a giant Iceberg to appear in the area. If you aren't already frozen by the giant mountain of ice, then you'll find yourself slipping off fast!

PIT

Pit from the classic NES game *Kid Icarus* makes his debut. Using the Palutena Arrow Special Move allows players to control the trajectory of the arrow by moving it up or down. Pit is a hard player to knock off, since can fly using the Wings of Icarus. However, his flight is brief and he cannot change direction in midair.

WARIO

It's hard to believe Wario hasn't entered the fray yet, but he's finally here! His overall fighting style is still a mystery, but it seems that one of his Special Moves will involve the Wario Chopper. He can also rip a nasty fart—the Wario Waft—and the longer you hold it in, the more explosive the release! His Final Smash transforms him into Wario-Man, an even goofier version of the yellow anti-plumber.

IKE

Longtime *Fire Emblem* fans can't wait to perform Ike's signature Aether strike, a Special Move where he throws his sword into the air, then catches it and slices his enemy.

POKÉMON TRAINER

Although Pikachu fights alone, the Pokémon Trainer has command of three different Pokémon! He can rotate between Squirtle, Ivysaur and Charizard. Trainers need to learn to balance the use of each Pokémon; if you change them too often or leave the same one out for too long, you will start losing stamina. Each Pokémon has three Special Moves, so the Trainer has access to all nine of them! The Final Smash, of course, is the Triple Finish, which utilizes all three Pokémon.

DIDDY KONG

Diddy is nowhere near as strong as his pal DK, but he's extremely quick and agile. Most of his attacks involve two of his gadgets, the Peanut Popgun and Rocket-barrel Booster. Using the Popgun can be a little tricky since it can go off in Diddy's hands if you charge it for too long. If you get hit while gliding around on the Booster, the barrels will separate and create mayhem. His Final Smash move, Rocketbarrel Barrage, combines the use of his Popgun (double wielding) and Boosters. The resulting peanut leftovers can be eaten to regain health (recover damage).

META KNIGHT

Fans are ecstatic to see Meta Knight from the *Kirby* series finally make his appearance. He probably has the most unique moves in the game, including Mach Tornado, where he creates a swallowing whirlwind; Drill Rush, a spinning attack that can plow through enemies; Shuttle Loop, which lets him glide after an upward stroke of the sword; and Dimensional Cape, a behind-the-back warp maneuver which will certainly disorient most opponents. His dark and ominous Final Smash move, Galaxia Darkness, has a slight tendency to miss...but if it connects, it's one of the most devastating attacks in the game.

KING DEDEDE

Kirby's Dream Land isn't complete without King Dedede, who makes his first appearance in a *Smash Bros.* game. He joins the heavyweight class along with DK and Bowser. His Super Dedede Jump is his signature move; when he lands, it creates a smashing blow to anyone close by. Unfortunately, he is extremely vulnerable when executing this move. He can pull out Waddle Dees, Waddle Doos and Gordos for some extra help. His hammer is also equipped with a special that can give him extra smashing power (Jet Hammer).

LUCAS

Lucas is a new character representing the *Mother* (*Earthbound* in the U.S.) series. Is he taking the place of Ness? He appears in the Japan-only release, *Mother 3* for the Nintendo DS. Like Ness, Lucas makes use of his PK powers, like PK Fire, PK Thunder and PK Freeze. His special PSI Magnet force can absorb projectiles and replenish his damage meter. His Final Smash, PK Starstorm, is possibly the coolest looking attack, where a rain of meteors falls from the sky.

SNAKE

Snake from Konami's famed *Metal Gear Solid* series makes a surprise appearance in the game! He almost looks out of place, but his amazing arsenal of covert ops gear makes him a perfect fit. He can launch mortars, throw grenades, plant mines, and fire his famous Nikita missile (which can be controlled, just like in *Metal Gear Solid*). He can also use his reconnaissance camera, the Cypher, to carry him back to the arena if gets too far out.

CONTINUED

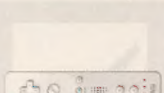
SONIC

Once Mario's rival during the Sega vs. Nintendo console wars, Sonic the Hedgehog finally joins the roster after much pleading from fans! Only three of his attacks have been announced so far: Spin Dash, Spin Charge and Spring Jump. Spin Dash and Spin Charge are based on his signature speedy moves that he's known for. Spring Jump places a spring mechanism under Sonic so he can propel high into the air. Apparently, other characters can also use his spring platform once it's been placed. His Final Smash move is currently a mystery.

OTHER CHARACTERS

There are plenty of other characters that are still being kept secret. Is Captain Falcon (from the *F-Zero* series) coming back? Is Captain Olimar (from the *Pikmin* series) really going to be in the game? Speculation and rumors are running rampant! One thing we do know is that there are plenty of Assist Trophy characters that will appear in the game. Assist characters will help you during battle, but you won't be able to control them. In fact, when you take out an Assist Trophy capsule, you won't know which character will appear until it is released. The announced Assist characters include Hammer Bro, Nintendogs, Samurai Goroh (from the *F-Zero* series), Dr. Wright (from *SimCity* for the SNES), Knuckle Joe (from the *Kirby* series), Devil (from the little-known Famicom game *Devil World*), Andross (from *Star Fox*), Lyn (from *Fire Emblem*), Mr. Resetti (from *Animal Crossing*), Excitebiker, Little Mac (from *Punch-Out!!*), Gray Fox (from the *Metal Gear* series) and Saki Amamiya (from *Sin & Punishment*). Poké Balls can also be thrown at enemies, unleashing any number of Pokémon, including Meowth, Groudon, Munchlax, Piplup, Snorlax and more!

CONTROLS



Wii Remote
(turned on its side)
COMPATIBLE!

Wii Remote + Nunchuk
COMPATIBLE!

Classic Controller
COMPATIBLE!

GameCube Controller
COMPATIBLE!

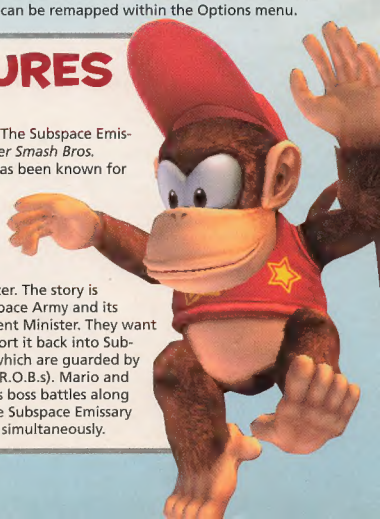
Super Smash Bros. Brawl will support four different playing styles: the Wii controller on its side (like playing a Virtual Console classic NES game), the Wii Remote and Nunchuk attachment together, the Wii Classic controller and the regular GameCube controller. So go ahead and dig out those old controllers when friends come over! If you're a seasoned *Super Smash Bros. Melee* player, you may even prefer the old control style. The idea is to give a wide range of flexibility for all player levels and preferences.

There are very little differences to the default control scheme for each controller style. The Wii controller on its side (classic NES-style) mode is slightly more challenging, simply because you're using the D-pad to move the character instead of an analog stick. The Wii Remote and Nunchuk configuration has an added bonus feature where players can shake the Wii Remote in a particular direction to launch a Smash Attack. Interestingly, Mr. Sakurai says that he prefers the GameCube controller because of the rumble. (He must be using a wired GameCube controller, because the WaveBird doesn't rumble.) All four controller configurations can be remapped within the Options menu.

GAME MODES & FEATURES

THE SUBSPACE EMISSARY

A new Adventure Mode called The Subspace Emissary is being introduced in *Super Smash Bros. Brawl*. The *Smash Bros.* series has been known for its superb multiplayer action, but this will be the first time that a full-featured single-player mode is being included. It's a complete side-scrolling game with plenty of cutscenes and back story for each character. The story is about the invasion of the Subspace Army and its supreme commander, the Ancient Minister. They want to cut up the world and transport it back into Subspace using Subspace bombs (which are guarded by Robotic Operating Buddies, or R.O.B.s). Mario and his friends will confront various boss battles along the way, including Petey Piranha, the giant flower and other nefarious foes. The Subspace Emissary also has a cooperative "Team" mode that lets two players take on the bad guys simultaneously.



VARIOUS MULTIPLAYER MODES

In Special Brawl mode, players can adjust various parameters before entering a multiplayer battle. In previous games, the different modes were predetermined, such as Giant Melee mode. In Tourney mode, players can arrange their own tournament ladder when playing with a large number of players. A new and improved Handicap option will also let players make the matches more even between veteran and casual players.

STADIUM GAMES

The two Stadium games—Home-Run Contest and Target Smash!—make their return. In Home-Run Contest, you have to beat on a bag to raise its damage meter as much as you can. You then grab a bat and smash the bag as far as you can before time expires. This mode can be played with two players and can also be played online. Target Smash! is a mini-game where players need to break all the targets in a timed speed-run. The key is to try to shave as much time off the clock with precise jumping and other maneuvering techniques.

CLASSIC MODE

This mode is the regular single-player game that has existed in the previous two games. You basically pick a character and go through and clear various stages with a number of pre-determined rules and conditions, from one-on-one battles to team matches.

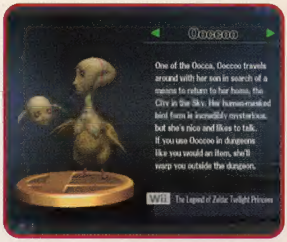
SNAPSHOTS AND REPLAYS

In-game snapshots can be taken at any time during a match. You simply pause the game, move the camera around and take a snapshot. Pictures can be saved onto your SD Card and can even be sent to anyone on your Wii Friends list. You can also record short replay videos (about three minutes long) during any brawl or Target Smash! session. These clips can also be sent to anybody on your Friends list. This will definitely help when you want to show a friend the fastest way to clear a Target Smash! stage.

STICKERS

This is a brand new feature that lets players collect an album of stickers. Stickers can be earned as rewards throughout the game and are much easier to acquire than trophies. They can be arranged in any fashion in your "notebook" and can also be sent as a snapshot to any of your friends.

TROPHIES



Oocco
One of the Oocca, Oocco travels around with her son in search of a means to return to her home, the City in the Sky. Her human-masked bird form is incredibly mysterious, but she's nice and likes to talk. If you use Oocco in dungeons like you would an Item, she'll warp you outside the dungeon.
Wii The Legend of Zelda: Twilight Princess

Various character and item trophies can be earned as prizes while you play the game. Each trophy can be viewed from any angle and they can even be placed and arranged with various backgrounds. Every trophy gives you a detailed description of each character and their origins.

ONLINE MODE

Using the Nintendo Wi-Fi Connection, you can challenge your friends online. Unfortunately, Sakurai warns that the further you are from your opponent, the worse your connection will be, so playing against people from another country may not result in smooth, lag-free gameplay. Short messages can be entered in advance and assigned to any direction on the D-pad. Just as a warm-up, you can beat on a Sandbag while the match loads and connects with other players.

SPECTATOR MODE

A special Spectator mode will allow people to observe online matches without actually participating in the match. Spectators can place wagers on matches using their Gold Coins. Pick the winner and your coin count increases! Stickers will be handed out left and right in this mode, so make sure you kick back and observe once in awhile.

STAGES

Where you battle is probably just as important as who you choose in battle when it comes to strategy. Each stage in the game continually shifts and changes as the battle wears on, making the terrain treacherous and unpredictable.

Battlefield—A standard wide-open arena with a night and day cycle.

Delfino Plaza—Based on *Super Mario Sunshine*. Fight in the air and on the ground.

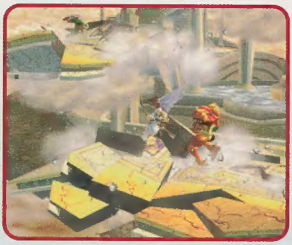
Yoshi's Island—This stage has four seasonal changes. Shy Guys can aid you in battle.

Lylat Cruise—Based on the *Star Fox* series. Asteroids and random spaceships appear.

Bridge of Eldin—Fight on a narrow, crumbling bridge from *The Legend of Zelda: Twilight Princess*.

Smashville—Like *Animal Crossing*, this stage changes from day to night in real-time, based on the Wii's internal clock!

Rumble Falls—Based on *Donkey Kong: Jungle Beat*. Players will need to keep up with the scrolling screen as it goes higher.

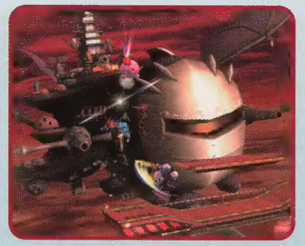


Skyworld—The *Kid Icarus* stage. The floors crumble but quickly regenerate.

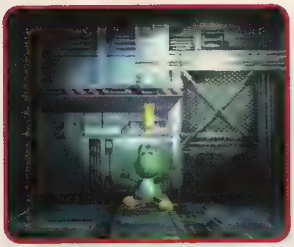
Castle Siege—Based on the *Fire Emblem* series. There are two levels: above the castle and in the castle.

WarioWare—Like the *WarioWare* games, you have five minutes to figure out every puzzle!

Pokémon Stadium 2—The terrain will transform into four different types: Electric, Ground, Flying and Ice.



Battleship Halberd—Meta Knight's battleship! Battle in the hangar first and then brawl on the ship's deck.

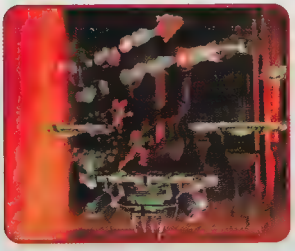


Shadow Moses Island—Snake's stage, complete with exclamation marks, Metal Gear robots and communication feeds from Mei Ling and Otacon!

New Pork City—An incredibly large and detailed city based on *Mother 3*.

Pictochat—Another bizarre stage based on the *Pictochat* function of the Nintendo DS. Pay attention to all the doodles.

The Summit—The *Ice Climber* stage. The glacier will eventually break off and fall into the sea.



Norfair—Based on the lava world from the *Metroid* series. Touch the lava and your damage level rises sharply.

The Temple—It's an almost exact replica of the same stage from *Super Smash Bros. Melee*. Other stages from the previous game will also be included.

So...is *Super Smash Bros. Brawl* the greatest video game ever? From what we've seen, we can't imagine anything better!

UNCHARTED
DRAKE'S FORTUNE

Strategy Guide by Pat Reynolds

If you took the Indiana Jones movies and mixed them together with the *Tomb Raider* games, the result would be *Uncharted: Drakes Fortune*. Action hero/tough guy Nathan Drake gets caught up in an adventure of truly epic proportions, and must shoot, punch and climb his way through a variety of locations while searching for the ultimate prize: a treasure trove left behind by his well-known ancestor, Sir Francis Drake. You'll need solid puzzle-solving skills along with your action game prowess to make it through this game, but luckily you've also got this guide to help you get past the tougher sections.

GAMEPLAY BASICS

Climbing

Like a more masculine version of Lara Croft, Nathan Drake is an expert climber and will need to make good use of this talent throughout his adventure. Watch for Nate's body language to clue you in about when he's able to make a jump to a safe location. While hanging or climbing, if Nate leans out and reaches his arm when you push in a specific direction, that means there's a safe spot for him to leap to. If he remains in position when you aim away from him, take that as a sign that he's not comfortable with jumping in that direction and look elsewhere for your next move.

Take Cover

You won't last long in the gun battles against *Uncharted*'s enemies if you stay in the open. Drake can hunker down behind just about any solid obstacle in the game—crates, walls, pillars, boulders—and gain the advantage of cover. While behind cover, Drake is pretty much immune to enemies on the other side and can pop out and take shots before ducking back behind cover again. Be careful, though—some cover, such as wooden crates, will deteriorate and eventually be destroyed under sustained fire. You can use this to your advantage to flush out hiding enemies.

Firearms

Nathan Drake is proficient with a number of firearms, from pistols to grenade launchers and military rifles. Knowing which weapon is best for a given situation will take you far in *Uncharted*. Your basic pistol is a surprisingly versatile gun, accurate at long range and excellent for pinpoint shooting. When close-quarters fighting is necessary, shotguns will drop just about any foe with a single blast. Rifles and grenades are excellent against the armored enemies you'll face off against late in the game. Keep in mind that the enemies in *Uncharted* always drop their weapons, so if you see a bad guy with a gun you want, take him out and go get it.

Hand-to-Hand Combat

When ammo is running low, Drake can rush at enemies and pummel them with a flurry of fists and other melee attacks. Tap □ repeatedly to perform a fast combo, while □, △, □ will perform a more powerful series of attacks. There's another benefit to defeating enemies in this manner: They'll drop more ammunition than when you defeat them using firearms.

Helpful Hints

If you get lost or can't figure out where to head next, wait around for a minute. In many locations, the game will prompt you by putting an "L2" symbol in the lower left corner. Holding the L2 button will focus the camera on your destination, and in some cases even give you some onscreen hint about how to proceed.

WALKTHROUGH

Much of *Uncharted* is fairly linear, and the game provides ample clues about where you need to head next. Use this guide as a reference, as it contains puzzle solutions and detailed information about some of the tougher areas in the game.

Chapter 1—Ambushed

This stage serves to familiarize you with the controls. Follow the instructions to defeat the attacking pirates. Aim for the explosive barrels on the decks of the pirate boats to quickly clear out their crews.

Chapter 2—The Search for El Dorado

In the open area with the stone pillars, climb up on the rocky shelves to the left, then make your way across the tops of the pillars. Navigate the ledges along the right side of the area until you reach the top of the large wall. Push the stone onto the ground below to break open an entrance into the temple. Drop back down to the ground and head inside.

After Sully uses his lighter to get the hanging braziers burning, take aim at the one closest to the blocked door. The wood blocking the door will catch fire and quickly burn away, allowing you to continue onward.

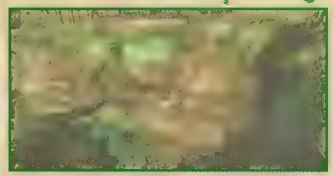
To cross the chasm in the first area of the temple, look for the explosive barrel positioned near the large pillar on the far side. Shoot the barrel to create a bridge to the other side.

After climbing down to the bottom of the well, shoot the barrels to clear out the debris blocking the ladder. Be careful not to stand too close to these barrels, as the area is rather small. Take the shot from a safe spot on the other side of the area.

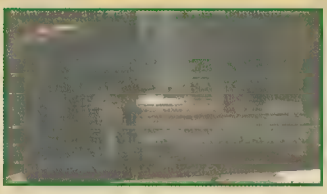
While Sully holds open the heavy stone door, go through and find the nearby cart. Push it beneath the door and Sully will be able to follow you into the next area.

The numbers marked near each symbol are important for the last puzzle in this stage. You'll need to climb the pillars along the walls and press each stone with the symbols in the order indicated in Drake's journal.

Chapter 3—A Surprising Find



To get on top of the submarine, swim toward the waterfall at the back of the lake and look for the rocky shelf on the right. Climb the ledges along the wall and make your way up and around the cliff face until you can safely drop down onto the top of the sub.



Make your way back through the ruins. This time, though, it'll be filled with enemies. Be sure to use cover at all times, popping out to take shots at exposed enemies.

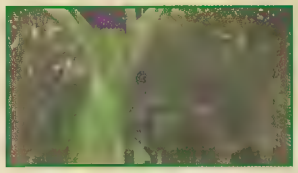
Chapter 4—Plane-wrecked

To maintain balance on the narrow logs here, you'll need to use the SIXAXIS controller's motion-sensitive capability. When Nathan leans in one direction, tilt the controller in the opposite direction to straighten him out again.

After clearing out the enemies in the open area, look for the connected columns. Get up on top of them to find the way over the blocked gate.

When you reach the river, look to the right to find some ledges that will allow you to cross to the other side.

Shoot the explosive barrel near the enemy on the cliff top to blast his truck across and onto the nearby pillars, creating a bridge that will let you safely cross.

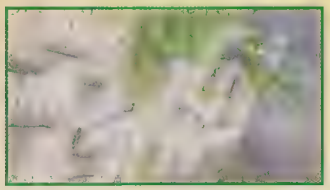


When you reach the clearing with the plane wreckage, defeat all of the enemies, then climb up to the front end of the plane using the rope that was helpfully attached by the bad guys. Climb back down and fight off the attacking waves of enemies. Eventually, more bad guys will blast apart the rocks blocking your escape route. Once they've been dealt with, follow the path leading out of the clearing and toward Elena's parachute.

In addition to the many enemies attacking you along the route, you'll also need to watch out for the brutal spiked traps that have been set up here. If you look closely along the ground, you can see the rope that will set these traps off. Should you trigger one, you'll have a split-second chance to avoid a quick death by tapping the ○ button.

Chapter 5—The Fortress

Before you can enter the fortress grounds, you'll need to make your way along the steep outer walls. Use the ledges and hanging vines to reach the first open window. In the hallway, look for an unbarred window on the right that will lead you back out to the wall for more dangerous climbing.



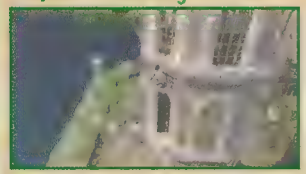
When you reach the ruins with Elena's parachute, climb up to the window and you'll find a zip-line waiting for you. Use it to reach the next area and get ready for a big gunfight. In the control room near where you land, grab the six-shooter from the desk—it can drop bad guys at long range with a single shot.

In the water-filled room, look for niches in the wall and climb to the first alcove. Use the winch to raise the water level. Now repeat this process to reach the opposite alcove and increase the water level again; this will allow you to reach the ruins stairs leading out of the room.

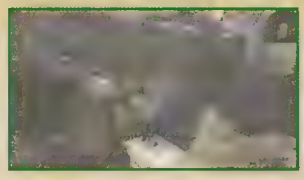
Chapter 6—Unlocking the Past

Climb up near the base of the tower and look for the winch that will open the gate in the courtyard below.

Chapter 6—Unlocking the Past

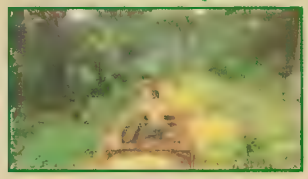


In the next area, climb the pillars and head for the platform near the rope. Use the rope to knock some pillars down, creating an opening into the previous area and giving you a route to the top of the tower. Here you'll find the key that opens the locked door at ground level in the area with the pillars.



To reach Drake's tower, when you come to the broken stairs, climb up onto the pillar to the right of the stairs and jump across to the opposite ledge. Shimmy across the ledges and then up into the next area. Carefully negotiate the pillars and ledges until you reach the window that lets you enter the building. Shoot the enemies before they can blast Elena with their rocket launcher to complete the chapter.

Chapter 7—Out of the Frying Pan



This quick chapter has Nate manning the mounted gun on the Jeep while Elena drives. Use the grenade launcher to take out the large vehicles like trucks and jeeps, and mow down the enemies on the smaller bikes with the machine gun. Listen for Elena's cues when you need to destroy a critical object, like the debris blocking your route.

Chapter 8—The Drowned City

Pilot the watercraft through the canals of the city, stopping to shoot the barrels and enemies that impede your progress. When you reach the enclosed area (after the small jump), head for the landing in the far corner and disembark.

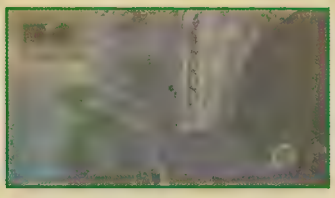
Fight through the enemies and climb the stairs at the far end. Jump over to the small ledge above the water and make your way over to the platform with the winch. Use it to raise the gate and complete the chapter.

Chapter 9—To the Tower

The watercraft section of this chapter is tougher than the first one, mainly because of the presence of more enemies, including some who wield grenade launchers of their own. Advance slowly and take out the bad guys as soon as they reveal themselves. When you reach the raised gate, shoot the weights on both sides to lower it.

Once again Elena will zip off and leave Nate to do the tough climbing. To reach the top of the tower, you'll need to change the position of the hanging chains by using the nearby levers. At the top, use the zip line to reach the customs house.

Chapter 10—The Customs House

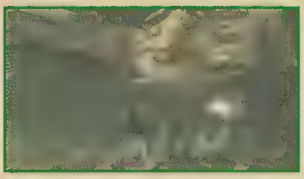


At the end of the series of broken platforms along the outside of the customs house, you'll need to shoot at the lock on the door at the far end. Inside is a winch that will open the gate to the next area.

Chapter 11—Trapped

TThe shootout inside the customs house is the largest yet—it gets pretty hectic with multiple enemies coming from all directions. The first enemy just ahead of the staircase has a Magnum, so take him out right away and grab the powerful hand cannon to make your next six shots instant kills. Your main objective is to take out the enemy manning the machine gun on the opposite staircase. After he's gone, use cover and stay along the walls to avoid being surrounded as you pick off the remaining bad guys.

Chapter 12—Heading Upriver



Now you're back on the watercraft, this time heading against a strong current that's propelling explosive barrels downriver. Shoot them out before they get close enough to impact your jet ski. You'll face more enemies with grenade launchers along this route—shoot them quickly to avoid a watery grave.

Chapter 13—Sanctuary?

Inside the library, consult Drake's journal for the answer to the puzzle with the four statues. Each one is marked with a compass heading and a name. Face each statue in the direction as indicated in the journal and a hidden door will open. In the chamber below, turn both torches on the wall to open another concealed doorway.

Chapter 14—Going Underground

In the chapel, after clearing out the bad guys, quickly shoot both bells so they ring simultaneously. This will open another hidden doorway leading out of the room.

Chapter 15—On the Trail of the Treasure

Above the chapel, carefully navigate the wooden platforms and ledges to reach the two walls with the large metal keys. Jump and grab each key—when both are activated, the stained-glass window will lower, revealing a hidden area. Shimmy along the ledge and jump to the platform to enter the room.

Fight your way to the mausoleum. Inside, another puzzle awaits. Consult the journal, then realign the symbols to match the pictures shown there. Only the snake, shell and arrows need to be adjusted—the rest are in the correct position. When all of the symbols match the journal, a secret door will open.

Chapter 16—The Treasure Vault

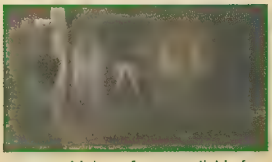
The treasure vault is an expansive, elaborate puzzle that has many false leads and dead ends. The trick here is to only follow the plates in the floors and walls that contain the numerals II, V and VII. All other numbers lead to false paths. After riding the elevator back down to the ground floor, take the stairs on the right and jump through the open window. Climb the chain up and you'll find another elevator that will open the gate.

Chapter 17—Heart of the Vault

You'll have to hold out against waves of attacking enemies until Elena drops a rope for you to climb to the top of the chamber. If you run out of ammo, look around the walls of the room—there are several weapons conveniently located there. Once at the top, you'll have to race down the tunnel ahead of the pursuing enemies. Don't stop for anything, just run straight until you reach the safety of the bunker.

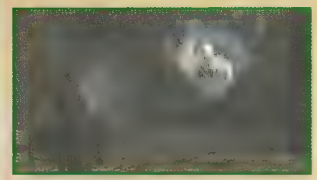
Chapter 18—The Bunker

Cross the high walls of the submarine pen by using the pipes and hanging chains. Don't move too slowly—some of the pipes will tear out of the wall if you hang on for too long!



Pick up the discarded submachine guns that litter the rooms of the bunker. You'll be attacked by multiple enemies as you near the generator room. From the dining room (the open room with lots of guns available for the taking), make a left at the exit and then take the next hall on the left to reach the generator room. Once there, turn the crank on the generator to restore power.

Chapter 19—Unwelcome Guests



In addition to restoring power to parts of the bunker, starting up the generator will also attract swarms of enemies. Stay on the move and shoot them down from a distance—these bad guys can kill Drake quickly if they get close enough. Run down the hallway with the red light and pull the lever at the far end. This will open another door off the generator room. Head there and pull the second lever. This one opens a door that will lead to a room with an old film projector. Fight off the enemies and leave via the closed door.

The remainder of this chapter is a hectic three-way warzone with the enemy mercenaries fighting against the creatures, and both groups attacking Drake when he gets too close. Hang back and let the opposing factions thin each other's numbers out before moving in to wipe out the survivors. On the far end of the sub pen you'll find a ladder leading back outside.

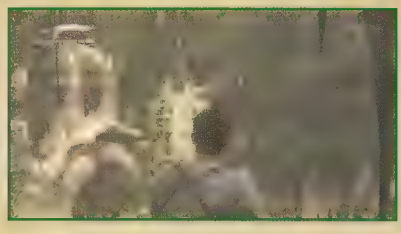
Chapter 20—Race to the Rescue

The courtyard will be crawling with enemies, but your biggest problems will be the snipers positioned high in the surrounding buildings. Stay out of cover for too long and one of them will be sure to end Drake's adventure with a single well-placed shot. Find a piece of cover and take them out before dealing with the remaining enemies in the area.

When the courtyard is clear, head up the stone staircase and into the church. More enemies await you—and be especially careful here, because when you clear out the bad guys inside, some backup will appear at the entrance behind you. Quickly finish them and then head to the altar to find a hidden passage.

Chapter 21—Gold and Bones

Run along the path to the left of the starting spot, blasting enemies without stopping and weaving your way around and up the stone stairs in pursuit of the helicopter. Try not to stop for anything—you can scoop up additional ammo dropped by fallen enemies as you run.



At the top of the stairs, leap directly at the hanging El Dorado to grab on and go for a ride.

Chapter 22—Showdown

Take cover behind the wooden crates, popping out to kill Navarro's henchmen when their boss pauses to reload. Navarro will run to the next area when his minions are all dead. Repeat this process in the next two areas, chasing Navarro each time he takes flight.

On the landing pad, Navarro will think he has Drake outmatched. Take cover and wait for him to stop shooting, then head for the crates to the right. Navarro will open fire again. When he pauses, hop over the crates and duck behind the next set. This time when he stops shooting, rush him and hit □ to begin a brutal combo. Hit △ and □ when they appear onscreen to knock his gun away. After the brief cutscene, rush at Navarro and repeat the combo attack to finish the job, and the game. Sit back and enjoy the ending!

(On the Classic Controller or GameCube controller, press **B, A, A, B, A, B, B, A** instead, then hold the D-pad in the direction indicated above and press **START**.)

Free Weapon Power-Ups

During the game, you can earn free weapon powerups by climbing partway up any surface that can be climbed (like a fence or the side of a truck) and pressing the following buttons simultaneously while your character is in his "climbing" pose. *Important note:* This will only work if your Life meter has two red bars of energy—no more, no less. You must jab the buttons at the exact same instant in order to trigger the code.

50 bazooka rounds—Tap **Left + 1 + 2** simultaneously. (On the Classic Controller or GameCube controller, tap **Left + A + B** instead.)

50 shotgun rounds—Tap **Right + 1 + 2** simultaneously. (On the Classic Controller or GameCube controller, tap **Right + A + B** instead.)

Virtual Invincibility

When your Life meter has exactly one red bar of energy, enter a doorway, cave entrance or military truck that leads to a room with enemies, crates and/or hostages. You must then exit that room while you still have exactly one red bar of energy, so don't pick up any muscle emphasis tablets, medicine or food. Once you're back outside, hold **Up** so that your character is pushing up against the doorway, cave entrance or truck that you just came from. (Note: To do this trick with one of the military trucks, you must hold **Up** while pushing against the rear corner of the truck.) While continuing to hold **Up**, quickly tap the **✚** button and the **1** button simultaneously. (On the Classic Controller or GameCube controller, hold **Up** and tap **START + B** instead.) You'll hear a chime and your character will flicker to confirm the code. When your energy runs out, you will now reappear with full energy at the spot where you died instead of going back to restart at the last checkpoint. *Important note:* This trick will only work in certain doorways in each stage, so if you can't activate it, try the next room you can find. It does not seem to work anywhere in Stage 6. Also, the effects of the code will be canceled each time you clear a stage or if you lose a life by falling off the screen. So stay away from the bottom of the screen—if you run out of energy and your "death" animation is triggered while you're near the lowest point of the playfield, your body can still fall all the way off the screen in any part of any stage, even if you're not on a bridge or other precipice.

75 Kremcoins

Enter the game's first stage, "Pirate Panic"—it doesn't matter if you do this in a new game or a saved game. Walk to the right until you see the entrance to K. Rool's cabin. Watch out for the two bananas on the ground right in front of the door; you must avoid these two bananas throughout the entire sequence or else the trick will not work. Walk inside the cabin, but do NOT touch the red 1-Up balloon; just walk out immediately. Back outside, you must carefully jump over the two bananas without touching them. Now go to the right and grab the first bunch of bananas you see on top of a set of barrels. Next, get back into the cabin without touching the two bananas in front of the door. This time, grab the red balloon and exit. Finally, go back to the barrels again and grab that same bunch of bananas, returning to the cabin without touching the two bananas in front of the door. When you enter, you'll find a spinning coin that gives you incredible 75 Kremcoins. Now you can access the Lost World through Klubba's Kiosks on any part of the island

Nintendo DS tips

ANIMAL CROSSING: WILD WORLD

Get a Golden Shovel

Buy a second shovel from Tom Nook and bury one of them in the ground. Remember where you buried it, and dig it up 24 hours later to find a Golden Shovel. The Golden Shovel can be used to plant money trees, although they will not always bear fruit.

Get a Golden Net

Catch all the bugs that appear in the game to get the Golden Net from Tortimer. It is not necessary to donate them to the museum, as long as you have caught them all. Note that bugs given to you by another player do not count toward getting the Golden Net. The Golden Net is wider than the regular net, making it easier to catch bugs.

Get a Golden Rod

Catch all the fish that appear in the game to get the Golden Rod from Tortimer. It is not necessary to donate them to the museum, as long as you have caught them all. Note that fish given to you by another player do not count toward getting the Golden Rod. The Golden Rod makes it slightly easier to catch fish

Get a Golden Can

Once Pelly or Phyllis deems your town perfect, keep it perfect for 16 days. The next time you speak to Pelly or Phyllis, you'll get the Golden Can. Use it on withering flowers to turn them to gold.

Get a Golden Slingshot

Shoot 15 floating presents out of the sky with the Slingshot. The 16th present you see float by will be the Golden Slingshot, so don't miss it! The Golden Slingshot fires three bullets at a time, making it easier to shoot down presents

Get a Golden Axe

Buy a red turnip from Joan and bury it in the ground. This starts a long trading quest which can get you some rare items, such as Tom Nook's Pic, K.K.'s pic, Pascal's Pic and the Golden Axe. Water the red turnip daily and dig it up later. (For this purpose, you can dig it up after one day if you don't feel like spending the time.) The next time Wendell is in town, give him your red turnip. He'll either give you the country guitar or the turban. If you get the country guitar, give it to K.K. Slider the next Saturday and he'll give you his picture. But if Wendell gives you the turban, give it to Saharah to get either a massage chair or a red vase. Give the red vase to Crazy Redd when he's in town to get the safe, which you should give to Tom Nook in exchange for his picture. If you got the massage chair, give it to Tortimer on your town's next holiday to get a scallop. Give the scallop to Pascal when you next see him to get either the Golden Axe or Pascal's pic. You can start the quest over (by purchasing another red turnip) if you want to keep all of the items mentioned above.

NINTENDOGS

Extra Treats

When you're training your dog to learn tricks, a yellow light bulb will appear over its head. You can grab the light bulb and feed it to your dog like a treat! You might also notice that sometimes a yellow bone will appear if you've been petting your dog a lot. You can feed this to it, too.

Constant Walks

Usually you can only walk your dog every half-hour. However, there is a trick that you can use to get around this limitation. Walk your dog to the park, then switch one of its accessories. The game will automatically save. Turn off the game and you can take your dog for a walk again immediately! This is a great way to increase your chances of finding rare presents.

Mystery Presents

When walking your dog, sometimes you'll see a present just lying on the sidewalk. Your dog will only pick it up if you notice the present and jerk your pooch in the direction of the present. These presents are usually better than the ones that are already marked by Question Marks on the map.

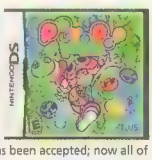
PUYO POP FEVER

Unlock All Gallery Items



Choose "Options" from the main menu, then select "Gallery." At the Gallery menu, highlight "View Cut scenes," hold the **X** button and press **Up, Down, Left, Right**. You'll hear a sound to confirm that the code has been accepted; now all of the cutscenes and the voice samples for all characters will be unlocked.

Microphone Tricks

• If you blow into the DS microphone at the main menu screens, bubbles will appear and the menu options will bounce.

• If you blow into the DS microphone during the instructional demo, the characters on the bottom screen will turn around to look at you.

• If you blow into the DS microphone when the map is displayed on the bottom screen during a cutscene, the character will react. Blow gently and the character will fight the wind; blow hard and he or she will be blown away.

• If you blow into the DS microphone during a match, your character will speak.

• If you blow into the DS microphone at the title screen, a mini-game will begin. A score will be displayed and a giant puyo will fall from the top screen. The object is to keep the puyo from falling off the bottom screen by using the stylus to bounce it back up. For best results, keep the stylus in contact with the touch screen and push the puyo up from below. You'll score a point for each bounce. After ten bounces, another puyo will appear; after 20 more bounces, a third will appear, with more appearing every ten bounces after that (up to a maximum of six). The last puyo to appear will be a nuisance puyo. If any one puyo falls off the screen or if you hit a puyo in its center, all of the puyo on the screen will pop. You can also push all of the puyo back up at once by blowing into the DS microphone, but you lose points for doing this.

Secret Mini-Game

If you complete the WakuWaku Course or HaraHara Course in Single Puyo POP mode at Normal difficulty or higher, you can play a mini-game while the credits are being displayed. Look closely at the pictures of each character and find the difference between the picture on the top screen and the one on the bottom screen. If you tap the part of the picture that's different on the touch screen, it will advance to the next character. (Note: You must tap it twice). Nine different characters will be displayed in succession, or 16 if you cleared the course without continuing. If you identify the flaw on all of the characters before the credits end, a special picture will be displayed.

RESIDENT EVIL: DEADLY SILENCE

Special Key

If you clear the game and get the "best" ending for either character, you will earn a special key. (To get the best ending when playing as Jill, you must rescue both Chris and Barry. To get the best ending when playing as Chris, you must rescue both Jill and Rebecca) If you load your game from a save where you unlocked the key, it will appear in your inventory at the start of the game. The key unlocks the door behind the dressing room (the room with the huge mirror on the wall) on the first floor of the mansion. You have to get the Armor Key first so you can unlock the big brown double doors to the east of the central room. Inside this room are brand-new outfits for Chris and Jill; one each in Classic mode and two each in Rebirth mode.

Master of Knifing

Beat the game once in either Classic or Rebirth Mode to unlock a five-stage mini-game called "Master of Knifing."

Rocket Launcher

If you beat the game in under three hours, you'll unlock a Rocket Launcher with unlimited ammo that you can use from the start

Note that items that you unlock are restricted to the file you used to save your clear data—if you got it by playing Jill/Classic, you can only use the item during a replay of Jill/Classic, etc.

SPIDER-MAN 2

Unlock All Special Moves

If you play *Spider-Man 2* with the Game Boy Advance game *Spider-Man: Mysterio's Menace* inserted in the GBA cartridge slot of the DS, all of Spidey's special moves will be unlocked when you start a new game or load a saved game.

If you haven't received the Arm Parts from Dr. Light by the time you fight Vile in Sigma Palace 3, Zero will give you his Arm Parts, which fire a different Charge Shot that causes more damage.

Secret Capsule

To use Ryu and Ken's *Street Fighter* Hadoken fireball as Mega Man X, beat all eight bosses and collect all the Life-Ups, Sub Tanks and Armor Parts. Make sure all of your Sub Tanks are full, then play through Armored Armadillo's stage without taking any damage. This is easier than it sounds if you make good use of the Rolling Shield and Storm Tornado. At the end of the stage, jump off the final mine cart so that you stick to the wall above the boss' door, and climb until you reach Dr. Light's Capsule. The Hadoken will kill any boss in one hit (except the final boss) and can be executed in the same way as in the *Street Fighter* series: Quickly rotate the D-pad or analog stick in a quarter-circle movement from **Down** to Forward, followed immediately (if not simultaneously) by the Attack button.

BALDUR'S GATE: DARK ALLIANCE II

Item Duplication Trick

You'll need two controllers for this trick. Pause the game and select the "Change Players" menu, then select a new character (preferably Dorn, since he can carry more). Drop whichever items you want to duplicate and have the second player pick them up. Next, save your game and transfer the items back to your primary character. Enter the "Change Players" menu again and import the second character from the fresh save. That character will have the items that you just dropped as well, so you can sell off any duplicates, have them both equip the same item or break items down at the shop and recover gems. With this trick, you can easily build up your inventory of gems and items by duplicating them and gain massive amounts of gold by selling the duplicate items.

Note: Most of the codes cannot be deactivated once you've turned them on; you must exit the game in order to restore the game to normal. **Do not save your game after entering codes;** if you do, the codes may be permanently activated in your save file. Also, some codes may cause unpredictable results which may cause the game to "crash," especially if you have several codes in effect at once. Codes that modify the appearance or behavior of vehicles or pedestrians will usually not affect those that are already in the immediate vicinity; you'll see the effects when new vehicles or pedestrians appear. The codes that cause vehicles to appear may not work if you're too far from a street or other area where vehicles are allowed to drive. Activating cheat codes will lower your criminal rating number.

However, after you finish the game and the credits roll, a prompt will appear asking you to save your game; doing so will create a new save file called "Headhunter V2." Loading this file will put you back at the start of the game, but the difficulty will be increased. The star dispenser will be unlocked when you play Headhunter V2, provided you have satisfied certain conditions:
• At the same time or before you earn your AAA License, beat Hank's record times in all 16 VR missions.
• During the same game that you accomplished the first condition, complete the game once.
Once you leave the LEILA office after obtaining your AAA License, you'll never be able to go back to it again. If you haven't obtained the record for all the VR missions by that time, you won't get access to the star dispenser after completing the game. Note: Completing VR missions by selecting "LEILA" at the main menu does not count; all of the records must be obtained from the VR simulator from within the LEILA office.

Mega Man X4: Alternate Mega Man X
At the *Mega Man X4* character-select screen, enter the following code carefully: Highlight Mega Man X, press the ○ button twice, press **Left** six times, then hold **L1** + **R2** and press **START**. When the game begins, Mega Man's costume will be slightly different—his arms and legs will be purple instead of light blue. More importantly, as you play the game with this code in place, you'll find different power-up items in the capsules that Dr. Light has scattered throughout the levels.
Mega Man X4: Play as Black Zero
At the *Mega Man X4* character-select screen, enter the following code carefully: Highlight Zero, hold the **R1** button, press **Right** six times, release **R1**, hold ○ and press **START**. When the game begins, Zero's costume will be black instead of red. Unfortunately, this code has no effect on the gameplay.
Mega Man X5: Start With Ultimate Armor
At the main menu in *Mega Man X5*, select "Game Start." At the player select screen, move the cursor to Mega Man X, then press **Up** twice, then **Down** nine times. To unlock Zero's Ultimate Armor, move the cursor to him and instead press **Down** twice, then **Up** nine times. You'll hear a special sound effect after entering either code correctly. When you begin the game, the player you chose will be wearing the Ultimate Armor.
Mega Man X6: Secret Codes
Use these codes to play as alternate versions of X or Zero in *Mega Man X6*. Note that you can only use one code at a time; for example, if you want to play as Nightmare Zero, you won't be able to use Ultimate Armor X in the same game.
• Ultimate Armor X—Press **START** at the first *Mega Man X6* title screen, then press **Left, Left, Left, Right** at the Game Start/Continue/Option menu. You'll begin the game with X's Ultimate Armor, which is very much identical to the same Armor from *Mega Man X5*. It allows X to fire a super charged shot, hover in place and perform the Mega Crush attack at will.
• Nightmare Zero—Press **START** at the first *Mega Man X6* title screen, then press **L1, L1, L1, R2** at the Game Start/Continue/Option menu. When you rescue Zero after defeating him in battle, you'll play as the Nightmare version of Zero instead of the normal version. Nightmare Zero has all of Zero's normal moves, but he is much more powerful.

When the Sega logo appears at start-up, notice that you can move Vectorman around the screen with Controller 1. To find a hidden game, move Vectorman under the Sega logo and shoot straight up at it exactly 24 times. Next, make Vectorman jump up and hit his head on the logo exactly 12 times. You'll see the words "Get Ready" on the screen, then the letters "S", "E", "G" and "A" will begin to fall from the sky; 120 of them, to be exact. If you catch between 90 and 109 letters, you'll be able to start the game at Day 5; if you can catch 110 letters or more, you'll warp to Day 10.

Vectorman: Blow Up Sega

Also at the Sega logo screen, stand on the ground just slightly to the right of the logo and fire your weapon straight up into the air. There's a TV set hidden just off the screen; if you blow it up, it will reveal an Orb power-up. (You'll have to jump up from the logo to grab it.) If you detonate the Orb, the Sega logo will go dark and the background will stop moving.

You can't shoot TVs or collect power-ups while you're an arrow, but you can destroy many enemies just by touching them. When you want to change back into Vectorman, just pause and enter the code again.)

Hidden Game

Load the "Making of *Arc the Lad*" disc, then—when the menu appears—press ○, ○, ×, □, □, △, ○, ×, □, **START**. A hidden checkers game called "*Arc the Lad* Slime Time!" will appear.

CD Debug Menu

Load the "The Making of *Arc the Lad*" disc, then—when the menu appears—press ○, □, then ○ seven times, then □, then **START**. A menu will appear, showing you the names of all the files and folders in the root directory of the CD. If you change discs, you can refresh the menu by pressing the **START** button...and if you highlight the name of an executable file and press ×, the PlayStation will run that program. The main program file in most PS one games has a filename that begins with the letters "SLUS" or "SCUS"—but you wouldn't want to execute these files anyway, because doing so will usually just launch the game in question as if it had been loaded normally. Look for executable program modules which are meant to be run from within the main program, usually after certain conditions and variables have been set up. These usually have a .EXE extension, but not always. Because you may be skipping important parts of a game's loading sequence by doing this, executing such files will usually crash the PlayStation and you'll be forced to start over. However, some games have very interesting features which can be accessed this way. A few examples:

Motor Toon Grand Prix—Execute the "R.EXE" file to play the hidden "*Motor Toon Grand Prix R*" mini-game

Alundra—Execute the "END.EXE" file to view the ending, or the "CLOSING.EXE" file to view the credits

Jersey Devil—Load the "CREDITS.EXE" file to view the ending credits

Zero Divide—Load the "RETURN.EXE" file to play the secret "*Tiny Phalanx* "mini-game (with Controller 2)

If you mess around with this trick, please be aware that you'll be toying with your games in a way that's not approved by Sony or anybody else, so don't blame us if you get unpredictable results or if something screwy happens with your memory card.

• Thanos—Press **Up**, **Up**, then press and continue to hold **L1**, then △, then □ (you should still be holding **L1** and △ when you press □)

To choose the alternate Player 2 color for Dr. Doom or Thanos, use the following codes at the character select screen:

• Dr. Doom—Press **Down**, **Down** and continue to hold **Down** on the second press; wait three seconds, then press and continue to hold ×, then ○, then **R1** (you should still be holding **Down** + × + ○ when you press **R1**)

• Thanos—Press **Up**, **Up** and continue to hold **Up** on the second press; wait three seconds, then press and continue to hold **L1**, then △, then □ (you should still be holding **Up** + **L1** + △ when you press □)

Once you've successfully entered the codes to play as each boss at least once, both boss characters will then appear at the "shortcut" version of the character select menu. Note that the above codes are shown as if you're using the default control configuration. If you've changed the controls, you'll have to adjust the codes so you're pressing the Punch and Kick buttons in the proper order.

At the character-select screen, enter the following code carefully: Highlight Zero, hold the **R1** button, press **Right** six times, release **R1**, hold ○ and press **START**. PARAPPA THE RAPPER

Rapping Tips

• If you hold one of the action buttons down, then press another one, the word that's associated with the first button will come out automatically as soon as you take your finger off the second button. Try this at the beginning of Stage 1, Lesson 3: While holding the △ button, press and release the ○ button repeatedly in a steady pattern. Parappa should say, "Kick, Punch, Kick, Punch, Kick, Punch" and so on, even though you're not pressing the △ ("Kick") button more than once. This trick also doubles your speed; instead of getting one word for each button press, you're effectively getting two. Use this technique when you're "Rappin' Cool!" for lots of extra words and bonus points.
• One of the game's best-kept secrets is that it's possible to use the D-pad to change the order of the words that come out of Parappa's mouth. This only applies in lessons or stages where more than one word is assigned to a single button; for example, during Lesson 5 in Stage 3, you say, "I have never sold everything, everything" using only the × button. If you hold **Left** on the D-pad and press one of the buttons, it will "reset" the list of words that are associated with that button to the first word in the series. Similarly, if you hold **Right** on the D-pad while you're in the middle of that series of words, it will "hold" that word and let you repeat it as many times as you wish; when you release **Right**, you can continue with the rest of the series of words that are assigned to that button. Depending on when you apply the D-pad, you can make Parappa say, "I have never, I have never sold everything" or even "I have never, never, never sold everything." This is an important trick; not only does it make it easier to break the "Cool!" barrier in certain lessons, but if you use this method to mix up your raps when you're freestyling in "Cool!" mode, you'll earn more points!

- *Punch-Out!!* Mode

Hold the **L1** and **L2** buttons when choosing a character in any one-player mode. You'll be playing in a semi-first-person perspective with your character drawn in green wire-frame, just like Nintendo's classic *Punch-Out!!* arcade game. There's a small gauge near the upper left corner of the screen that helps you to judge your distance from your opponent.

- Super Juggle Mode

Hold **SELECT** and **Up** on the D-pad before the "Vs." screen appears; when the round starts, you'll hear an explosion sound. Now whenever you use an attack that makes your opponent go up in the air, they will go much higher, which makes juggling more interesting.

TEMPEST X3

Power-Up Swarm

At the start of a stage in "Tempest X3" mode, shoot the first creature and fire your superzapper before the power-up reaches the top of the playfield; do *not* collect this first power-up. Now play normally and you will receive power-up items from nearly every enemy you shoot.

Cheat Codes

At any time during the game—at the title screen, menus or during the game—hold **L1, R1,** △, ○, **START, SELECT** and **Up/Left** on the D-pad. You'll hear a loud grinding noise to indicate that the master cheat code is in place. Once you've done this, you can do any of the following tricks during the game:

Level Skip—Hold **R1** and tap **L1,** then fire your superzapper. The screen will be cleared and you will advance to the next stage immediately.

Trippy Mode—Hold **L2 + R1 +** △ **+** ✕ and press **Up.** The graphics will leave freaky trails of light on the screen; perfect for those mind-altering experiments at your next party.

.MOD Music—Hold **L2 + R1 +** △ **+** ✕ and press **Right.** The music will change to the .MOD music when you start the next stage.

Remix Music—Hold **L2 + R1 +** △ **+** ✕ and press **Left.** The music will change to the remix music when you start the next stage.

A.I. Droid—Hold **L2 + R1 +** △ **+** ✕ and press **Down.** You'll hear the A.I. droid say "Attack!". Now if you can make it to through the current stage without losing a life or using the Level Skip cheat, the first power-up that appears in the next stage will give you the A.I. Droid.

High Score Trick

At the three-character High Score entry screen, enter your initials as "GAY". The blue shape in the background of the High Score screen will be changed to a spinning pink triangle.

Hidden Game Modes

Play until you earn the top spot on the High Score table; you must earn over 500,000 points to get there. Once you do this, the game will ask you to enter a five-character name in addition to the usual three-letter initials. Enter your name as "H_V_S"; those are spaces in the second and fourth positions. Save the game to your memory card. Now you'll find two new game modes at the main menu: "Tempest Plus" and "Tempest 2000".

Devil May Cry 4

Publisher: Capcom
In Stores: February

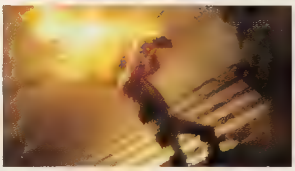
Even if you didn't play the previous *Devil May Cry* games, it's not hard to get into this one. Dante, the hero of past games, is seen slaughtering his fellow knights by Nero, a young warrior with a powerful "Devil Bringer" arm and an uncanny resemblance to Dante. From there, it's non-stop action split between the two using a whole new

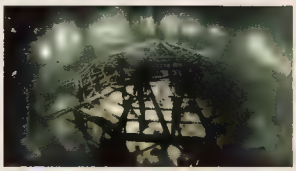
for each character. Most notably, Dante wields a weapon called "Pandora's Box," a briefcase that functions as a variety of weapons like a rocket launcher and chain-gun. Nero can use his Devil Bringer arm to seize and destroy enemies or grasp far-off ledges...oh, and summoning spirits to bo ster his attacks. Sword attacks now three stages of damage as w

Alone in the Dark

Publisher: Atari
In Stores: 1st Quarter 2008

The fifth installment of *Alone in the Dark*, a series which grandfathered the survival-horror genre, takes protagonist Edward Carnaby on an adventure set in New York City's Central Park. According to the developers, the entire park—including the sewers beneath and surrounding city—is entirely represented in the open-world environment. The game's chapters (think of them like episodes of *24*) include combat scenarios, puzzles and driving missions in which the city crumbles around you. Carnaby comes equipped with various gadgets as well as the know-how to hotwire cars, and he can interact with elements like fire to progress. Naturally, anything that burns in the real world burns in the game.





Mario Kart Wii

Publisher: Nintendo
In Stores: 2nd Quarter 2008

If *Super Smash Bros. Brawl* isn't your thing (and even if it is), *Mario Kart* is also coming to the Wii! With a nifty peripheral that looks like a steering wheel (packaged with the initial release), you'll be ready for single-player and multiplayer racing on both classic and new tracks. The game supports online play with 12 races and up to 12 players (so far). As in *Mario Kart DS*, the vehicles include the traditional go-karts as well as flashier rides like motorcycles. (Biker-Chick Peach for the win!) Each character has a custom vehicle, be it a flashy hot rod or swank limo. The Wii remote can be placed right inside the racing wheel for intuitive control, so whether you're a n00bcake or an old pro, you can pick up and play the game.

Army of Two

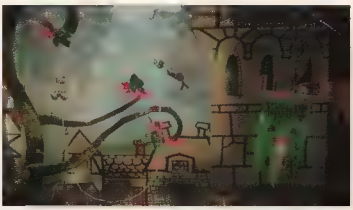
Publisher: Electronic Arts
In Stores: 1st Quarter 2008

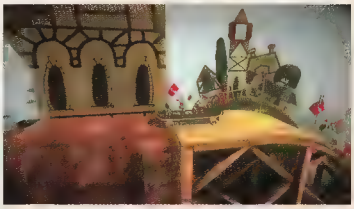
While the outrageous co-op attacks you can pull off in *Army of Two* aren't necessarily realistic, the concept of playing part of a privatized military force reflects how many conflicts around the world are being handled. The game combines modern military scenarios with classic shoot-'em-up gameplay. The catch is that you're never alone. With computer-controlled or live co-op, you're constantly paired with another mercenary and your survival often depends on how well you work together. One player can go "aggro" to draw fire, or the pair can pull off elaborate human turret moves and assist each other over difficult terrain. If you're taken down, you'll need to rely on your partner (and I kid you not, tampons) to save you.

LittleBigPlanet

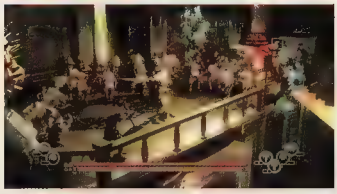
Publisher: Sony
In Stores: 3rd Quarter 2008

It seems like the wait would never end, but its finally time for *LittleBigPlanet*, the quirky little level-building, beanbag-smacking heart stealer from Sony. As a spunky customizable little bean bag, you explore and create your own mini-worlds, as well as worlds created by other users. For a game that looks simple, the physics and detail put into the environments really showcase the power of the PS3. With co-op play, up to four people can run around together, helping each other conquer obstacles and collecting Sponge (the in-game currency), which can be used to buy new items and add to levels. *LittleBigPlanet* will bring a smile to anyone's face when they pick up the controller and play.



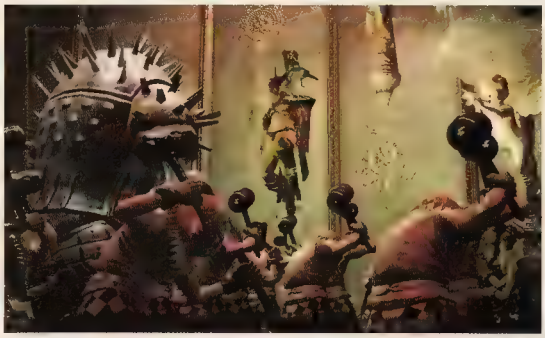


Kingdom Under Fire: Circle of Doom



Publisher: Microsoft
Available Now

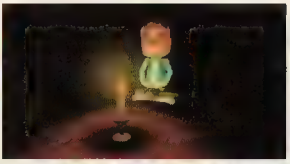
Circle of Doom is a co-op-enabled RPG, the third in the *Kingdom Under Fire* series. Players can select one of six avatars, elfkind or warrior…you know, the RPG basics. From there, up to four players can immerse themselves in battles, customize their characters and trade equipment. Item drops are randomized in order to create demand for online trade. When characters sleep, they enter another realm where they learn more about their quests and obtain new abilities. What separates *Circle of Doom* from other RPGs is the cooperative play, with up to four friends facing the game's dangers online. Time to recruit some *World of Warcraft* players!

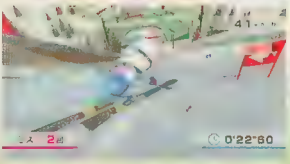


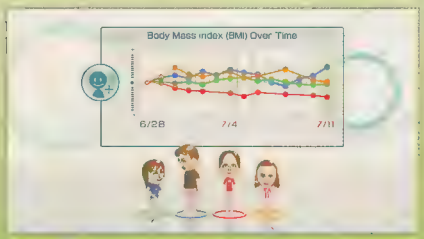
Wii Fit

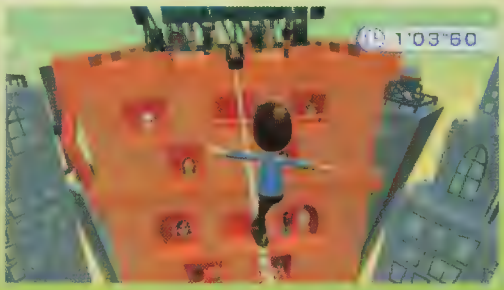
Publisher: Nintendo
In Stores: 1st Quarter 2008

Is it a game? Sort of. Is it fun? Absolutely. *Wii Fit* seems to be the love child of the step aerobics craze of the early '90s and *Wii Sports*. It's not just a balance board that accurately measures your weight and BMI; it's a regimen of yoga, standard fitness exercises and games all in one. You'll headbutt soccer balls, see how long you can stand one foot, practice basic yoga and more. Surprisingly responsive and accurate, the Wii Balance Board peripheral offers an interesting way to stay in shape. *Wii Fit* not only appeals to moms, but to the average gamer. The skiing level is one good example of this; you'll be surprised how sore your legs are the next morning.





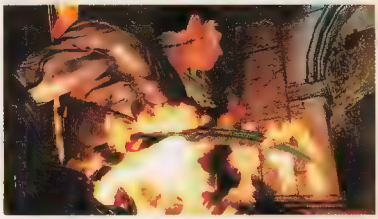




Dark Sector

Publisher: D3
In Stores: 1st Quarter 2008

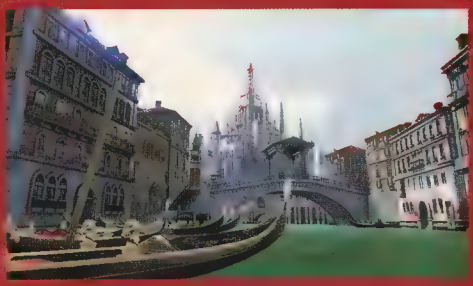
Hayden Tenno does the C.I.A.'s dirty work in a crumbling eastern bloc nation. Luckily, due to a rare disease, Tenno is unable to feel pain. So when he's exposed to a substance that mutates its victims, instead of dying from the process he develops a glaive arm that he can use as a projectile or melee weapon. Aside from firearms, there are biological weapons to be concerned about...so as Tenno progresses, his arm gains more defensive abilities as well. You can modify your firearms on the black market, but be wary of picking up enemy guns—they're equipped with biological sensors, so you can't use them for very long. *Dark Sector* also features a multiplayer online mode.



Ninja Gaiden II

Publisher: Tecmo
In Stores: 2nd Quarter 2008

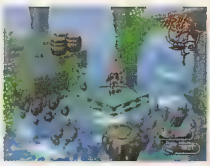
With the recent revamp of *Ninja Gaiden* for the PS3, it's easy to feel a bit left out if you're a 360 owner. *Ninja Gaiden II* is being developed specifically for the 360, with a new combat system and difficulty levels that will make it accessible to those who are new to the series. The settings range from Tokyo to New York with same bloody and challenging action of the previous game. Armed with talons, a scythe and a new game engine, the Ryu of *Ninja Gaiden II* is capable of more gore and more flashy moves...as are his enemies. The game includes a single-player mode that offers roughly 30 hours of action and the ability to upload Karma scores to *Xbox Live* as well as a Master Ninja Tournament where players can battle online.

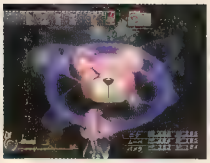


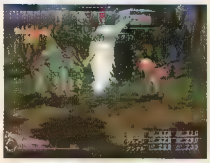
Mana Khemia

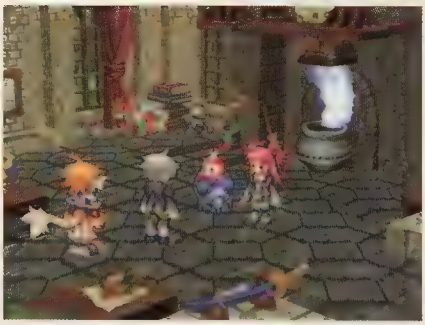
Publisher: NIS America
In Stores: March

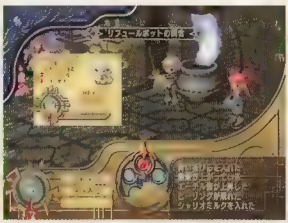
Described by its publisher as a "spiritual sequel" to the *Atelier Iris* series, *Mana Khemia* tells the tale of young Vayne Aurelius, a student of alchemy. Vayne has enrolled at the Al-Revis Academy, a Hogwarts-style campus where students and teachers craft potions, weapons and other items that influence their ability to conquer enemies. And we're not talking about brawling in the gym or fraternity hazing: At Al-Revis, the professors assign "academic quests" that require Vayne to team up with other students and complete missions, using the skills they have crafted to cast magic spells or beat down monsters with fighting-game combos and projectiles. If you want to keep up your GPA and graduate with high alchemic honors, you'll have to spend countless hours crafting away like a crafty little craftsman. Will Vayne become the big magician on campus, or will he alienate the student body by screwing up the curve?







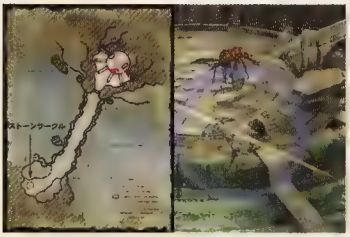




Ninja Gaiden: Dragon Sword

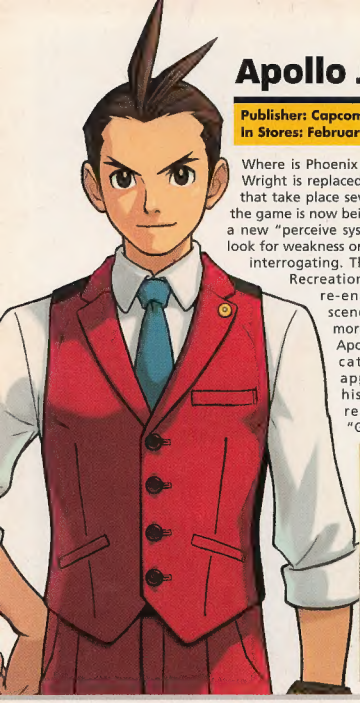
Publisher: Tecmo
In Stores: March

Ryu is making his debut on the DS as well, in an adventure that is nearly 100% controlled by the touch screen. If you're skeptical of this idea, remember how well the recent *Phantom Hourglass* controls worked. In *Dragon Sword*, the DS is held like a book, with action on the right side (there will be an option for lefty play) and a map on the left. The graphics are a combination of 3-D and 2-D art. Like *Phantom Hourglass*, a sword swing results from a simple swipe of the stylus, with special attacks being initialized by drawing over a special symbol on the screen. Jumps and throws are executed with taps and blocking with the D-pad; it feels more intuitive than complicated.



Apollo Justice: Ace Attorney

Publisher: Capcom
In Stores: February



Where is Phoenix Wright? In the fourth game of the *Ace Attorney* series, Wright is replaced by attorney Apollo Justice (what a name!) in four cases that take place seven years after the last game. Already available in Japan, the game is now being translated for the rest of us. *Apollo Justice* features a new "perceive system" that lets Justice look for weakness or "tells" in those he's interrogating. There's also a "Crime Recreation Mode"to let you re-enact the crime scene...and there's no more "Take that!" Apollo has a new catchphrase, applicable to his ability to read witnesses: "Gotcha!"

Patapon

Publisher: Sony
In Stores: February

Besides having a fun name to say, *Patapon* is a rhythm-based action/platform game that uses drumbeats to guide an army of Patapon creatures through various adventures in order to return them to their homeland. As the game progresses, you'll have to customize your army to help fight the evil Zigotons, including upgrading items, weapons, shields and armor. The customization options you choose will make a huge difference on the battlefield. There are over 30 missions which entail armed escorts, boss battles and hunts, all while keeping time with war drum of the Patapon god. The game features an original score and gets its unique and abstract graphic style from famed French graphic artist Rolito.

Scattered throughout our *Tips* pages are cheat codes that we call "Mystery Codes"—these are codes that are known to work, but we're not sure what effect they have in the game in question. Please note that these codes may not have any effect at all; there's a very strong possibility that they were left in the games inadvertently or that their effects were intentionally disabled before the games were released. However, we invite you to prove otherwise. Test out these codes for yourself; you might be the first person (other than the game's programmer) to learn what a Mystery Code does!
